DETAILED ACTION

Allowable Subject Matter

1. Applicant is advised that the Notice of Allowance mailed July 5, 2007 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 23, 25, 26, 28 and 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Bauer (5,082,310).

Bauer discloses a decorative skin layer (decorative element) 130 is connected to the closure (cover cap) 105 and covers at least one of the frangible webs (tear-open edge) 124, see figure 13. The decorative element 130 is fastened to the closure (cover cap) 105 via the foam layer 128, see col. 4, lines 33-35 and lines 52-62 for fastening details. As noted in col. 7, lines 25-30 the decorative element 130 includes frangible seams (predetermined breaking points) 132 and as shown in figure 3 and described in col. 7, lines 40-43 the frangible seams 132 are aligned with and matching the pattern of weakening webs 124. Perforations 115, 117 are provided as the predetermined breaking points. The decorative element

Art Unit: 3616

comprises a softer carrier material 128 and a harder covering layer 105; and wherein a material weakening 132 as the breaking point is provided in the covering layer. A rear side of the covering layer includes the material weakening 132 and wherein the carrier material engages into the material weakening, as shown in figure13. The decorative element comprises plastic.

Allowable Subject Matter

4. Claims 24, 27, 29-33 and 37-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
